# Perfect green for every condition

Ecological win and technical challenge

WORKSHOP

January 19-20, 2012  
Barnstorf · Germany

## DEAR SIR OR MADAM

Natural greening becomes more and more important for the integration of so-called problem sites in landscapes such as slopes, slag heaps, shore areas and steep and erodible areas. But because of exposure, direction and soil texture of these sites conventional greenings are unsuitable. Appropriate greenings must adjust to the site requirements and have to meet ecological, economical and structural requirements as well.

In the course of this two day workshop you will gain basic and expert knowledge regarding the greening of problem sites. On the basis of expert's presentations and practical examples you will learn techniques and methods which enable you to create long term natural greenings.

We are looking forward to welcome you!

Kind regards,  
Your IGG-Team

## PROGRAM

### Thursday, January 19th, 2012

13.00 h	Thomas Roess, Internationale Geotextil GmbH Welcome & Introduction	17.45 h	Lars Obernolte, ATL Begrünnungs GmbH European Association for erosion control and landscaping (EFEB)
13.30 h	Dr.-Ing. Dipl.-Wirt.-Ing. Stefan Cantré, University of Rostock, Chair of Engineering Work Research and recent developments in erosion control	18.00 h	Charlotte von der Heide, Internationale Geotextil GmbH Flood channel Rees
14.15 h	Dr. Egon Stalljann, SW-Düngesysteme GmbH Introduciton of problem sites worldwide	19.30 h	Traditional dinner "Kohl und Pinkel"
15.00 h	Coffee break		
15.30 h	Dr. Gerd Reidenbach, LVG Erfurt Seed mixtures for problem sites		
16.15 h	Helmut Kroth, Tensar International GmbH Vmax <sup>3</sup> in reinforced steep slope applications		
17.00 h	Tim Lancaster, North American Green Reinforced soil with Vmax <sup>3</sup>		

### Friday, January 20th, 2012

9.00 h	Plant visit Roess Nature Group
10.30 h	Peter Hemelaer, FiNN Corporation Hydroseeding
11.15 h	Dr. Volker Seidel, Robert Frank, Ökon Vegetationstechnik GmbH Xylite for purification of polluted surface water
12.00 h	Richard Edwards, Salix River & Wetland Services Ltd. New developments and research projects (UK)
12.45 h	Summary and discussion
